MAPS

All maps are at 1:4000 with 2.5m contour interval, updated and drawn using ISSprOM 2019-2 in 2024. The maps will use the changes made in revision 6 of the ISSprOM standard, which include:

New Symbols Added

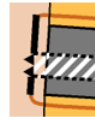

Retained Earth Wall

Area with obstacles

Continuing point after map exchange

Area runnable at lower level for buildings

The symbol for an area with obstacles (symbol 533) will be used for larger bike parking places or area's with a lot of climbing / exercise objects.

2

Symbol 531: Prominent man made feature is used for individual objects in a playground.

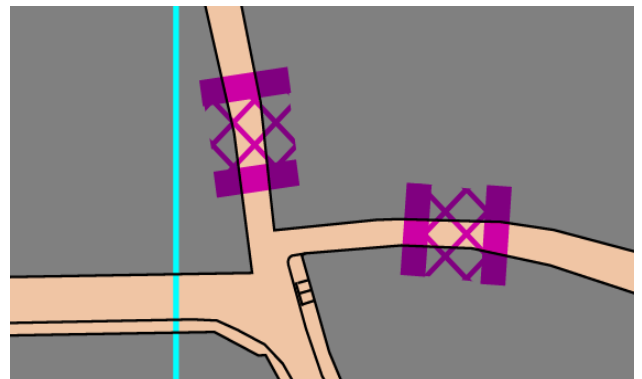

Symbol 530: Prominent man made feature is used for large art objects.

Symbol 526: This symbol is used for statues.

ARTIFICIAL FENCES

On the second day artificial fences will be used to make courses and route choices more interesting. These fences will be used for all categories. At an artificial fence there will be a steward with a yellow jacket, also the artificial fence will be marked on the ground with red/white tape. The steward will be standing in the middle of the fence of the map. You are not allowed to cross this symbol on the map. Doing this will lead to disqualification. Running up to the steward, but realizing your mistake and turning back is permitted.

Bulletin 2.1 (04-05-2024)

DAY 1 - STREET CROSSING

On the first day, the courses 1, 2, 8, 9, 10 and 11 will have a obligatory street crossing with a time neutralization in between. At the end of the afternoon, when a lot of people will return home, this road is expected to have quite some traffic. The car part is a zebra crossing so runners should get priority when crossing. The more cautious part are both bike lines before and after the zebra crossing. They are not part of the zebra crossing, so runners will not get priority anyway.

Please be careful at this part and be sure you see the bikes and the people riding the bikes see you. Nowadays a lot of bikes in The Netherlands are electrified, so everyone is capable to reach a high speed on those bikes.

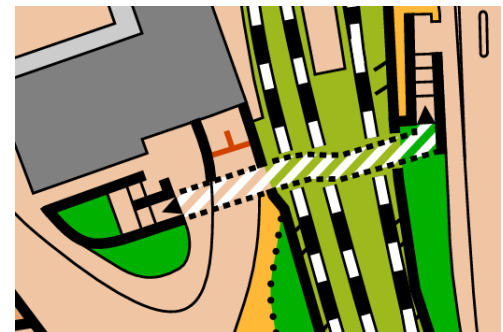

Because of that the time is neutralized (for 45 seconds) on this part of the courses to give you enough time to cross the complete road.

DAY 1 - TUNNEL

On day one, courses 3, 4, 5, 6, 12 and 13 will have to pass underneath the railway tracks by using the tunnel. This tunnel has two parts with separate entries, one for people on foot and one for people on a bike. The middle part of this tunnel is shared, with partly a fence in between. The part for bikes is not accessible for people on foot, therefore it is also not mapped.

Please make sure you stay on the correct side of the track in the tunnel and do not use the entries for bikes. The bike part of the tunnel is not part of any route choice, you are not allowed to be there on foot (as traffic signs show) and therefore these tunnel parts are not mapped.
